PROFESSIONAL EXPERIENCE

Digamend Technology Solutions

Full Stack Developer

03/2024 – present | Chennai, India

CorlMart

- Designed and developed backend API using Node.js and Express.js for managing product information.
- Created and maintained MongoDB schemas for efficient data storage.
- Implemented AWS S3 for secure file storage, with robust upload/download functionalities and access controls.
- Collaborated closely with the front-end team (React) to ensure seamless API integration.
- Gained insights into cloud deployment processes by working with the deployment team using AWS services.

Internal Portal Development and Maintenance

Timesheets Module: Designed and implemented a timesheet system to track employee hours, project allocation, and overtime. Ensured seamless integration with payroll systems.

Leave Apply and Approve Section: Developed a comprehensive leave management system allowing employees to apply for leave and managers to approve or reject applications. Implemented features for leave balance tracking and notifications.

Payslip Management: Automated the generation and distribution of payslips through the internal portal, ensuring accurate and timely delivery of payroll information to employees.

One IT: Contributed to the development of a unified IT services portal providing employees with access to support tickets, IT resources, and knowledge base articles.

Project and Task Management: Created an integrated project and task management system to facilitate project planning, task assignment, progress tracking, and collaboration among team members.
